

# Volumio OS, the music playing OS with IQ

**For all your musical needs, and then some...**

At Volumio we keep innovating to make the best possible product, offering the best possible user experience. Our main focus is to tailor make our own OS to work in perfect unison with state-of-the-art technology with only one goal in mind: the best universal program for our community of audiophile music lovers to satisfy all their musical needs. We look upon our Volumio application as being smart, but in fact the Volumio OS has serious IQ.

**The best music playing OS for the audiophile in all of us**

Ongoing innovation has brought us to the point where we are right now. The Volumio OS has evolved to be really accessible, really informative and really intuitive. Many, many hours of research and development have been poured into our beloved unifying software, to make it perform better and better, without cutting corners or making compromises to our core values of high-end technology and high-quality music reproduction. The result lies before you. The Volumio OS can be used by everybody who seeks quality in their music. You can build your own system based on the Volumio OS or go for one of our Plug & Play solutions. No matter which system you choose, you can rest assured your OS with IQ matches your IO with IQ

**Get the Volumio OS together with our Premium Volumio plan**

Of course, you can use our Volumio Free plan, it offers everything you need to play all filetypes containing your music with our iOS and Android app and use our plugin store which contains Spotify Connect, Radio Paradise, Soundcloud and Web-Radio playback. But to get the most out of our Volumio OS we offer our Volumio Premium plan starting at € 6,49 billed monthly or billed yearly at € 59.99. Not sure yet? You can try it before you buy it during our 15 days free trial period. With Volumio Premium you can enjoy our complete catalogue of features, like the new Manifest User Interface, Multiroom Synchronized Playback and be able to play music natively from TIDAL, Qobuz and Highresaudio.com. Of course, you can also access your music on up to six devices from your local network, play and rip CD's, play from Bluetooth devices and from digital and analogue inputs.

We invite you to become our half a millionth user. We are planning to celebrate this event in a big way. Feel free to come and jam with us!
